

## Free Workshop for the Water Utility Sector December 8 – 9, 2015 | Edison, New Jersey

### About the Workshop

The U.S. Environmental Protection Agency is offering an interactive training workshop to help utilities:

- Understand the future impacts of climate change on their region, as well as the water sector
- Explore strategies for reducing risk and enhancing resilience to extreme weather events
- Plan ahead for addressing long-term climate change impacts

The Extreme Events and Climate Adaptation Workshop will include opportunities for collaborative exchange of ideas as well as hands-on training with the EPA's Climate Resilience Evaluation and Awareness Tool (CREAT), version 3.0.

**CLICK HERE TO REGISTER!**

### Who Should Attend?

- Drinking water, wastewater and stormwater utility operators
- Local, state, federal and tribal government officials
- Watershed planners
- Water sector associations
