Commissioner MacFarlane also asked why chemicals (hydroxide) and other administrative fees were slightly higher this month to which Mr. Cornforth explained that hydroxide is the chemical used in the pump stations for odor/corrosion control. He noted that while there have been no anomalies, he suspects that the tanks were filled twice in the month (once in the beginning and once at the end) and will keep an eye on it moving forward. Mr. Krienc added that this line item is under budget for the year. Regarding the administrative fees, Mr. Planamento explained that the majority of this line item consists of bank fees (letter of credit, NJEIT, debt fees, etc).
