

**New Jersey Environmental Infrastructure Financing Program
Project No. S340-640-24**

Construction of Wet Weather Upgrades and Improvements to the CCMUA's Delaware #1 Water Pollution Control Facility, with a capital cost of \$3,785,476 was financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project consists of upgrades to the Authority's 80 MGD wastewater treatment plant located in Camden City, NJ allowing it to receive more wet weather flow and, thereby, reduce combined sewage flooding and overflows in Camden City and Gloucester City,

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
