Sludge Dryer Facility Rehabilitation

Contract 612R

Construction of upgrades and improvements to the Sludge Dryer Facility at the CCMUA Water Resource Recovery Facility, capital cost of \$37 Million, were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by providing an additional 10 years of usage for the existing systems and extending the life of the building support systems. For residents and businesses in Camden County, these improvements will ensure more reliable service, reduce the risk of system failures, and protect public health and the environment.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
